

ILLATOS LANG

CANDLE CARE

When you burn your soy candle for the first time, ensure to burn your candle until the wax pool reaches the edges of the glass. This will create a memory, and prevent it from tunneling. Burn your candle for two or three hours at a time.

Ensure to trim your wick to 1/4 inch before each burn to remove the “mushroom”. This is a build up of carbon. Be sure not to trim too short as it will affect your next burn. Discontinue burning your candle when it has reached 1 cm from the bottom of glass.

Simply, wash out the glass with hot soapy water when finished. You can use our empty glass as a small vase, in the bathroom to display cotton balls, toothbrushes or even a penholder. All Illatos Lang candles are made from 100% Ecosoya wax, kosher certified and hand poured with love.

TO PREVENT FIRE OR INJURY:

- Always burn on a stable, heat resistant surface
- Never leave a burning candle unattended
- Never burn a candle on or near anything that can catch fire
- Keep candles out of reach of children and pets

Thank you for choosing an ILLATOS LANG candle
