WHY CHOOSE SOY WAX?

- Soy wax is 100% vegetable and does not contain any petroleum unlike paraffin waxes. Paraffin candles release chemical pollutants into the air when burning and have been linked to health risks such as asthma, allergies and even cancer.
- Free from pesticides & Herbicides and is biodegradable.
- Contains no genetically modified material.
- They have a slower burning rate than other waxes, which make your candle last longer.
- Easily cleans up using hot soapy water and will not stain clothing etc.
- Not tested on animals
- Kosher Certified

As you can see soy wax is a clear winner in our eyes and we hope you love our decision to use such a premium, natural wax.
